

## CAT 2 (SMA 2101) - 2024 October

Calculus 2 (Jomo Kenyatta University of Agriculture and Technology)

Scan to open on Studocu

**JOMO KENYATTA UNIVERSITY OF AGRICULTURE AND TECHNOLOGY**

**SMA 2101 CALCULUS I**

**(CAT 2)**

**TIME: 1 HOUR**

1. Find  $\frac{dy}{dx}$  given

- (a)  $y(x) = (x+x^2)^5(1+x^3)^2$       (b)  $y(x) = \frac{(1-x^2)^3}{(4+5x+6x^2)^2}$       (c)  $y(x) = [x + (x+x^2)^{-3}]^{-5}$   
(d)  $y(x) = (\sqrt{x}+1)\sin(\sqrt{x+\sqrt{x}})$       (e)  $xy^3 - yx^2 = \sqrt{y}$       (f)  $\cos(x+y) = \sin(x)\sin(y)$   
(g)  $xy = 6e^{2x-3y}$       (h)  $y(x) = \tan\left(2 + \sqrt{\sin(2x)}\right)$

2. Given  $G(x) = f(h(x))$ ,  $h(1) = 4$ ,  $f'(4) = 3$  and  $h'(1) = -6$ . Find  $G'(1)$ .
